Dr. Emily Pollard is celebrating her 30th year in practice. She focuses on breast enhancements and body contouring. Her practice offers treatments including liposuction, tummy tucks and CoolSculpting. She also specializes in prejuvenation, which refers to noninvasive treatments in younger patients to prevent the signs of aging rather than correct them later. "Cosmetic surgery can be transformative, but a collaborative approach with your surgeon is so important," Dr. Pollard says. "You must be on the same page."
